

ONE CHOICE MANY SOLUTIONS

CRANE, RIGGING, LIFTING AND TRANSPORTATION FOR OIL & GAS INDUSTRY

With Boss Crane & Rigging, you receive services from experts with hundreds of years of combined experience delivering oil drilling rig transportation, assembly and disassembly, and crane and rigging services for fracking, coiled tubing and wireline services. Between our headquarters in Northeast Texas and our South Texas Yard in Southwest Texas near the Eagle Ford Shale Play, BOSS is in the position to reduce your costs associated with the travel time it takes for our cranes, trucks and personnel to reach your drilling and fracking sites. Our Oilfield Services & Supply location in Palestine, TX, allows us to provide transportation services to and from your sites in East, West and South Texas, Oklahoma and Louisiana.

“After multiple Monday vendor reviews, there has been nothing but positive feedback on **BOSS Crane & Rigging's** crane services and performance, and that is completely unheard of. We cannot think of any case using another vendor in which we did NOT receive some kind of negative feedback.”

A \$30 million exploration and production company
