

SERVICES FOR PETROCHEMICAL/REFINERY PLANTS

At BOSS Crane & Rigging, we have the expertise and capacity to manage your maintenance turnarounds, whether they are massive-size projects requiring multiple cranes and personnel or ongoing smaller jobs. Not every crane and rigging company can say that they have spent 15 years putting together a team of highly experienced crane operators, riggers, supervisors and project managers with up to 30 years of experience in multiple locations nationwide. Having experienced personnel throughout the states enables us to offer competitive pricing without sacrificing quality. Our expertise is executing on large-scale projects in a timely manner.

“After multiple Monday vendor reviews, there has been nothing but positive feedback on **BOSS Crane & Rigging's** crane services and performance, and that is completely unheard of. We cannot think of any case using another vendor in which we did NOT receive some kind of negative feedback.”

A \$30 million exploration and production company
